

International Legislators Forum Annual Highlights/Focus

During all annual meetings of the Legislators Forum, water issues have been a topic of conversation in the context of flooding, drought and water quality. In addition, each year has had a specific focus and at least one highlight issue. Those issues have included:

MB 2001—Sponsorship of 2Nation Tours, a travel and tourism program among the four jurisdictions.

MN 2002—Memorandum of Understanding (MOU) among legislative leaders in the four jurisdictions to meet annually and provide substantial support for Conservation Reserve Enhancement Programs (and analogous programs in Canada) in order to address flooding, drought and water quality issues.

SD 2003—Establishment of a regional renewable fuels working group called Powering the Plains (PTP) and beginning efforts to bring emergency management officials from the four jurisdictions together to enhance cooperation and coordination across borders.

ND 2004—Beginning of significant efforts to study methamphetamine and pharmaceutical issues across borders in order to address addiction issues and alternatives to incarceration.

MB 2005—Building on the agreements to address methamphetamine issues across borders, broadened the discussion to include collaboratively addressing all inter-jurisdictional criminal justice issues.

MN 2006—Emphasized the importance of basing water related public policy issues on sound science. Supported the efforts of the four jurisdictions' Attorneys General to address methamphetamine and criminal justice issues and their signing of an inter-jurisdictional Amber Alert MOU to enhance mobilization in the case of child abduction.

SD 2007—Provided broad support for the Regional Energy Roadmap that had been developed by the PTP participants, supported the enhancement of broadband technology, especially in rural areas of the four jurisdictions and expressed significant concerns to the US Department of Homeland Security and other relevant US and Canadian entities about the implementation of the Western Hemisphere Travel Initiative (WHTI).

ND 2008—Highlighted issues related to rural community development, health and infrastructure issues, including the need for further enhancement of broadband technology in the region and continued the ongoing discussions of water (LIDAR mapping), energy and cross-border identification issues.

MB 2009—While specifically focusing on Lake Winnipeg, the delegates developed agreements to address regional water quality and quantity issues, regional energy issues and cross-border security, identification and tourism.

MN 2010 – Discussions centered on water issues in the Red River basin and included recommendations and requests from the Red River Basin Commission regarding management, impoundment, retention and diversion. Energy, commerce, border security and the media were also highlighted.

SD 2011 – In addition to updates and discussion on the developments in the Red River Basin, the focus of the Forum was on research and development efforts within the four jurisdictions and the existing and potential opportunities for collaborative initiatives.

ND 2012 – The Forum focused on energy (integrated regulations); water (basin-wide collaboration); and trade (coordination and harmonization of regulations and policies).

MB 2013 - Delegates addressed the existing economic relationships throughout the region and explored options to support and expand opportunities to leverage the regional and cross-border relationships to strengthen the economic future of all the jurisdictions. Additionally, the delegates outlined a set of general principles regarding energy development and related policies.

MN 2014 - Members of the delegation, guests and sponsors participated in a variety of agricultural-related presentations, demonstrations and activities that provided an overview of the historical aspects of the agricultural industry, its current role in the region and nation, the use of current and developing technologies, and the ever increasing demands to supply food for the world's growing population.
