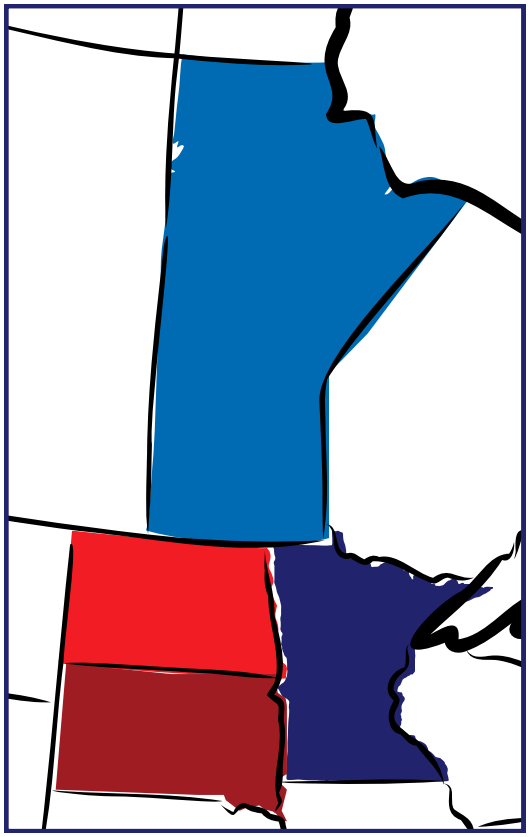
About

The **International Legislators' Forum (ILF)** is a nonpartisan, consensus-oriented convening of legislators from the northern plains region of North America. Legislators meet, learn, explore problems, build relationships, and develop collaborative solutions on a variety of issues affecting their jurisdictions. Since its founding, the ILF has been convened and facilitated by **Consensus Council**.

The ILF grew out of the International Flood Mitigation Initiative, which developed agreements following the 1997 Red River Basin flood. Over decades of annual meetings, delegates from **Manitoba, Minnesota, North Dakota**, and **South Dakota** have identified mutual concerns and discovered that efforts originating in one jurisdiction can be pragmatically applied across borders.

Discussions during the annual Forum have transcended politics and ideology, and delegates have formed long-lasting friendships that help them respond to shared challenges. We are pleased to return to South Dakota to celebrate the 25th annual International Legislators' Forum.



The **25th Anniversary International Legislators' Forum** will convene in historic Deadwood, South Dakota.

CONSENSUS COUNCIL
